Instructions for using the DAGA timer

Thank you for sharing your scientific findings in the form of a lecture at DAGA.

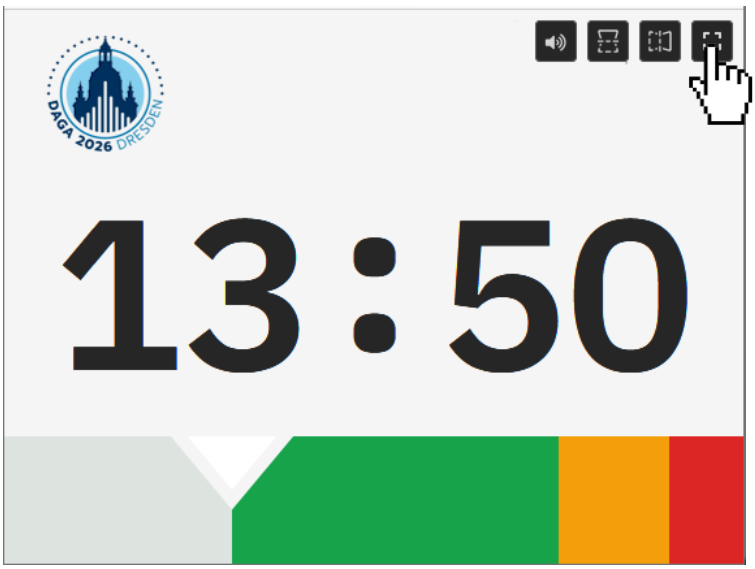
TIMING OF A LECTURE

Lecture sessions strictly follow the time schedule:

- 15 min lecture
- 3 min discussion
- 2 min break / change of speakers

TIMER

The time structure for each presentation is visualised by the stage timer. It shows the remaining time for each presentation, discussion and break, and emits an acoustic signal after each phase.



ACCESS TO THE TIMER

All speakers and session chairs can access the stage timer on their device via a browser:

- Before the DAGA:
  The link will be activated here approximately one week before the DAGA and can be tested from then on.
- On site:
  Scan the QR code on the help card attached to the lectern (for speakers) and in the front row (for session chairs).

OPERATING INSTRUCTIONS

- Please mute the sound on your device.
  The signal at the end of each phase will be played through the room speakers.
- To keep the timer permanently visible on your smartphone and bypass the display timeout, please activate full-screen mode by clicking on the button in the upper right corner of the stage timer. Please note that this will increase battery consumption.
- If your browser does not display the countdown correctly, please reload the website (or change your browser, if possible).
